PROFESSIONAL SUMMARY

Business professional with close to 2 years of experience at McKinsey & Company, working in a high-pressure consulting support environment alongside global strategy and operations teams. My role involved understanding business context, working with data and performance metrics, and converting analysis into clear, decision-ready outputs for senior stakeholders. I have strong exposure to business analysis support, reporting, KPI tracking, and operational insights, and I am now seeking to transition into a Business Analyst or Product Operations role where I can take deeper ownership of analysis and execution. Comfortable working with Excel, Power BI, and basic SQL, and known for reliability, structure, and delivery discipline.

SKILLS

- Business analysis and requirements understanding
- Stakeholder coordination and clarification of business needs
- Problem structuring and logical breakdown of business issues
- Process analysis and identification of gaps and inefficiencies
- KPI definition, tracking, and performance monitoring
- Operational analysis and insight generation
- Business reporting and executive-ready summaries
- Product operations and execution support
- Cross-functional collaboration with business and delivery teams
- Agile fundamentals and SDLC awareness
- Proficient in transforming complex data into visually compelling dashboards and graphics
- Strong analytical ability in interpreting and deriving insights from data
- Excel-based analysis for business and operational reporting
- Trend analysis and identification of performance drivers
- KPI dashboards and performance reports
- Root cause analysis based on quantitative and qualitative inputs
- Data interpretation for decision support
- Basic statistical understanding (averages, trends, variance)
- User Acceptance Testing (UAT) support exposure
- JIRA and Confluence (basic usage)

EXPERIENCE

Business Presentation Specialist

Feb 2024 - Nov 2025

McKinsey & Company - Chennai

- Worked closely with consultants across strategy, operations, and finance engagements, supporting them with structured analysis, reporting, and presentation of business insights.
- Interpreted problem statements and translated data, metrics, and qualitative inputs into clear analytical narratives for client-facing discussions.
- Regularly handled Excel-based data, performance indicators, financial figures, and operational metrics to support decision-making.
- Created and refined KPI-driven reports, charts, and dashboards, ensuring accuracy, consistency, and alignment with engagement objectives.
- Coordinated with multiple stakeholders under tight timelines, clarifying requirements and incorporating feedback efficiently.
- Delivered a high volume of executive-ready outputs while maintaining strong quality standards and minimal rework.
- Recognized internally for ownership, dependability, and ability to work calmly under pressure.

TECHNICAL PROFICIENCY

- **Microsoft Excel** (Advanced) – formulas, pivots, charts, dashboards
- **Power BI** – basic to intermediate dashboards & reporting
- **SQL** – basic querying, data extraction
- **Microsoft PowerPoint** (Advanced) - Visualization
- JIRA (basic), Confluence (basic)

PROJECT EXPERIENCE (ACADEMIC / SELF-INITIATED)

Business Performance Dashboard

- Built Excel-based dashboards to analyze sales, cost, and operational KPIs
- Identified trends, gaps, and performance insights to support management-level decisions

Market & Customer Analysis

- Conducted structured market analysis and customer segmentation
- Delivered insights using data-driven storytelling and visual summaries
